

# ECE 2713 Digital Signals and Filtering

## Handout: How to Install Matlab on Your Own Computer

Spring 2026

The University of Oklahoma has a campus-wide site license for Matlab. This means that you can install Matlab on your own computer and run it for educational use, including use for this course. Here's how:

1. Use this link to go to the MathWorks web site: <https://www.mathworks.com/academia/tah-portal/university-of-oklahoma-norman-557289.html>
2. On this page, click the "Sign in to get started" button and log in with your OU 4x4.
3. Click on the button that says "Install Matlab."
4. Follow the operating system specific instructions provided on the website to install for your OS. If using linux, make sure to run the installer using sudo.
5. Make sure to install at least the following components which are **required** for this course:
  - a. Matlab
  - b. Signal Processing Toolbox
  - c. DSP System Toolbox
  - d. Control Systems Toolbox
  - e. Symbolic Math Toolbox
